PROFILE SUMMARY

As a Backend Developer, I bring proficient programming skills, a passion for continuous learning, and a strong sense of responsibility to the table. My goal is to excel in a prestigious company where I can challenge myself and contribute significantly.

In the short term, I aspire to work in my current role over the next four years. Looking ahead, my vision is to evolve into a seasoned professional engineer who makes a lasting impact.

WORK EXPERIENCE

Software Engineer | ViCK

Oct 2022 - Present

- Developed and enhanced a bespoke Content Management System (CMS) with features for posting, order management, and SEO.
- Architected and implemented a multi-platform payment system, integrating popular gateways like MOMO and VNPAY. This system leverages Kafka and Apache Ignite for high responsiveness and accuracy.
- Developed a companion e-wallet for convenient fund management and seamless transactions within the platform.
- Built a real-time chat application enabling user interaction with WebSocket technology.
- Designed and developed a stock trading system, allowing users to place orders on the company's system with real-time data from the Vietnamese stock market.
- Streamlined product delivery by implementing a CI/CD pipeline using Maven, GitLab, Jenkins, and Sonarqube, optimizing DevOps workflow and reducing time to market.

Back-end Developer | Aladin Finance

Nov 2021 - Oct 2022

- Developed and enhanced a Trading Platform for managing client portfolios and enabling simultaneous order placement across various securities accounts.

Personal Project
